

1

Enabling Universal Harmony with Intelligent Data Formats and Translation

Julian E Gómez, Ph.D.
Polished Pixels

2

Confluence

- Much more than mash-ups

3

NASA Virtual Iron Bird Description

- <http://ic.arc.nasa.gov/vib>

4

NASA Virtual Iron Bird Key Points

- Simultaneous multiple parallel information network view/navigation
 - The V&C of MVC
- Knowledge, not data
- Knowledge Integrating Model

5

Art Institute of Chicago *Digital Archive for Architecture*

- Description

6

ArtIC DAA Key Points

- It's becoming commonplace to build a digital archive
- Possibilities as information networking is engaged
 - [The Color of Palo Alto](#)

Takeaways

- ♣ The 21st century is about information
- ♣ It will come from everywhere and be functionally combined for the context
 - ♣ You call that a data warehouse? That's not a data warehouse, mate. *THIS* is a data warehouse.
- ♣ Enabled by data standards and intelligent translation
- ♣ Frameworks will make it accessible and extensible
