

Web3D Publishing Tools and Techniques

X3D Toolchain for Repositories and Model Management

Digital Heritage Congress and Web3D 2025 Conference Tutorial

Siena Italy, 8-10 September 2025

Don Brutzman

Web3D Consortium

don.brutzman@gmail.com

Repositories and Model Management

- [X3D Book, X3D Resources, X3D Scene Authoring Hints, X3D Tooltips](#)
- [X3D Example Archives](#) ~4000 models with full Quality Assurance (QA)
- Live Code editors: [X_ITE](#) and [X3DOM](#) (with Jupyter python planned)
- X3D authoring tools: [X3D-Edit](#), [Sunrize](#), [Castle Game Engine](#)
- [X3D export and import](#) using converters and authoring tools
- Archival metadata and provenance
- Summary of numerous online resources
- [San Carlos Cathedral](#) example and others
- Recommendations for all of us

Tutorial in long form is available online:

X3D Assets and X3D-Edit Authoring Tool

Web3D 2024 Conference web3d.siggraph.org

Guimarães Portugal, 25-27 September 2024

[Online with X3D-Edit](#)

X3D offers full Web-page integration, animation, user interaction, archival stability for 3D models as an ISO International Standard, hyperlinks, Web scalability, provenance metadata, etc. etc.

Web3D Conference, 30 years online

3D technologies for the World Wide Web

- The annual ACM Web3D Conference is a major event which unites researchers, developers, entrepreneurs, experimenters, artists and content creators in a dynamic learning environment. The conference also focuses on recent trends in interactive 3D graphics, information integration and usability in the wide range of Web3D applications from mobile devices to high-end immersive environments.
- Amazing cumulative contributions, supports our evolving challenges
- One step at a time... yes we can change the world! Again and again!
- dl.acm.org provides ongoing **availability, influence and impact**
- What paper will you work on and write for next year's conference?

Publication Years	Publication Count	Available for Download	Citation Count	Downloads (6 weeks)	Downloads (12 months)	Downloads (cumulative)	Average Citations per Article	Average Downloads per Article
1995 - 2025	769	736	6,501	2,702	30,575	326,141	8	443

Book: X3D for Web Authors

- <https://x3dgraphics.com>
- Building and interacting with 3D graphics is a "hands on" experience. Throughout this book there are lots of examples to study and modify. Practice helps you learn how X3D works.
- Corresponding online course includes [examples](#), [slidesets](#), and [videos](#).
- The book presents the essential ideas needed to understand how an X3D world is constructed. Book chapters build upon each other, progressing from simple ideas to sophisticated concepts.
- X3D: Extensible 3D Graphics for Web Authors assumes only that you are interested in learning more about 3D graphics. Some experience with other Web technologies (such as HTML or XML) is helpful. No prior programming experience is needed.

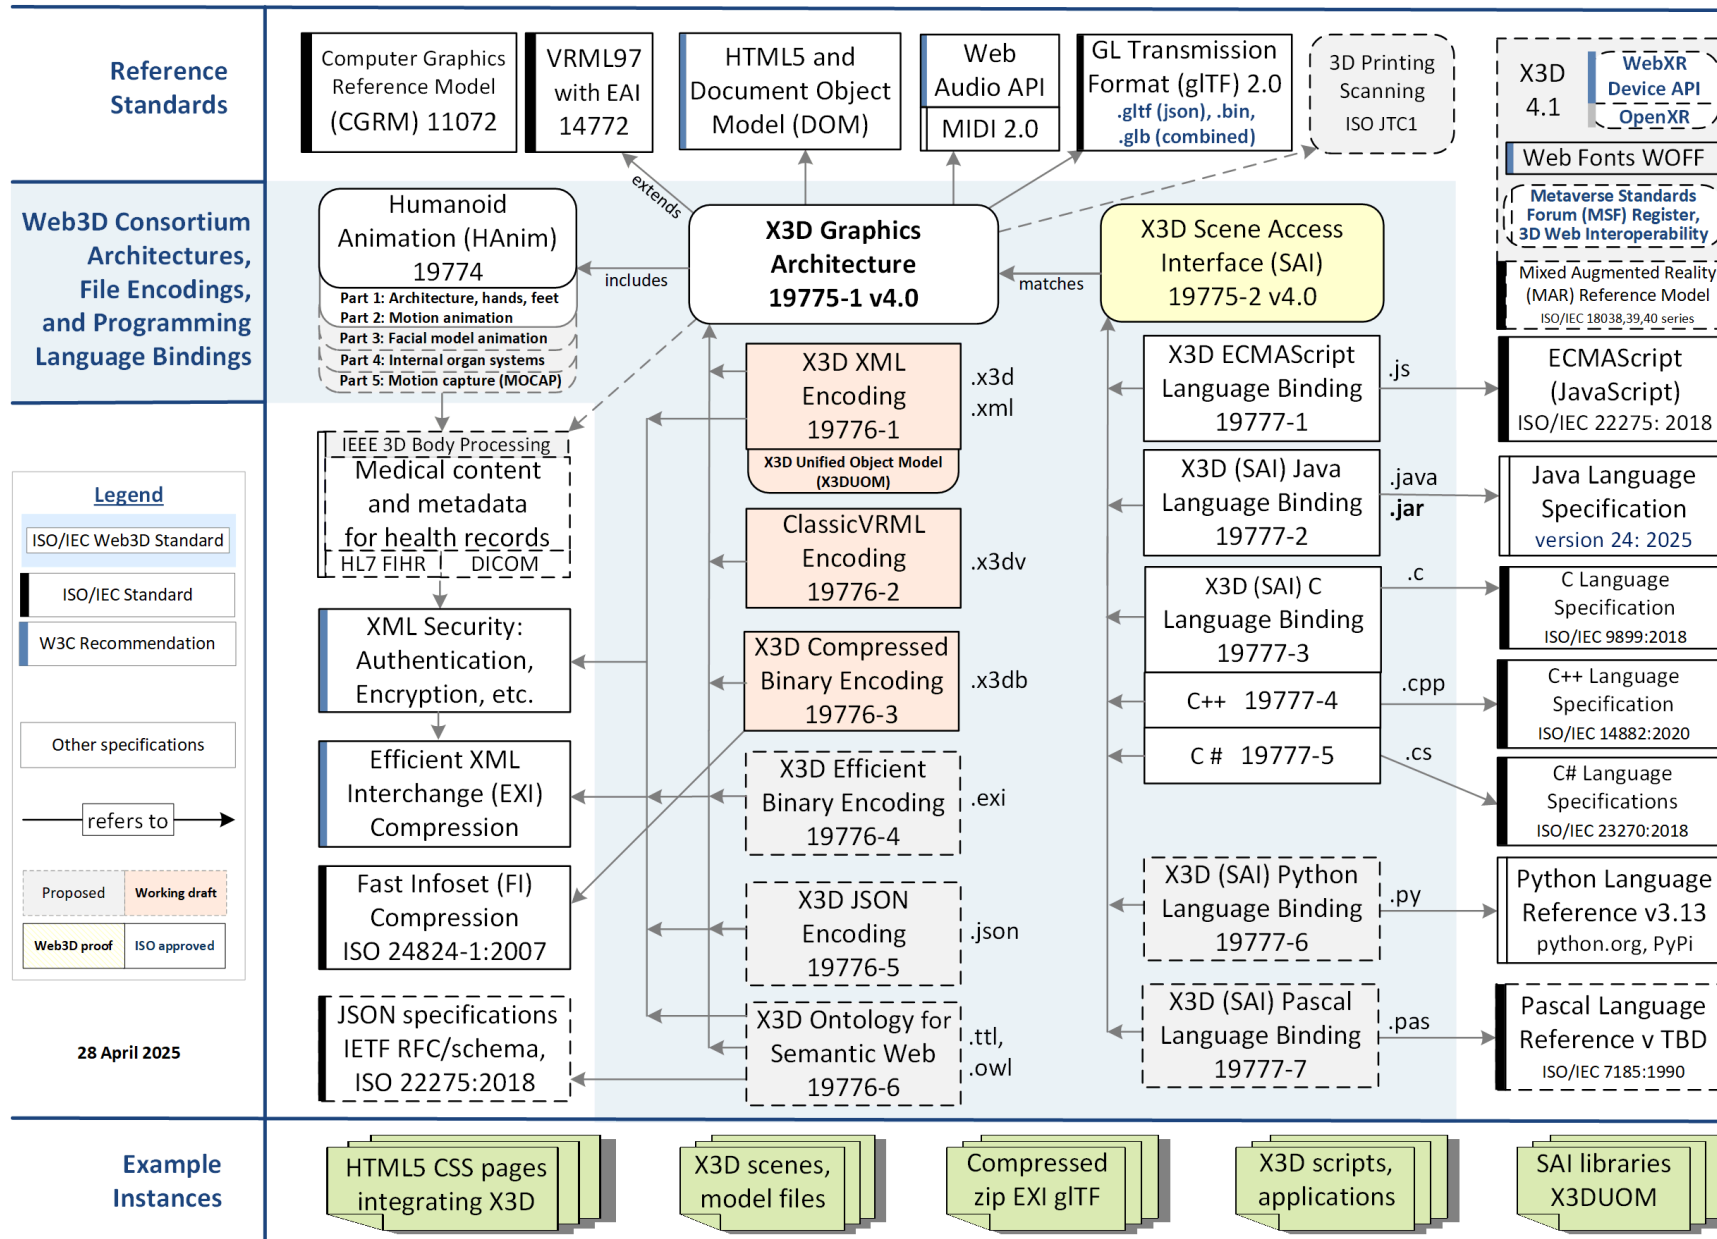

X3D Application Stack: Presentation Layer Alternatives

User Experience	HTML5, CSS, JavaScript	Native GUI Application	XR headset, immersive displays
3D Modeling	X3D, ClassicVRML	glTF2, extensions	Import, conversion of numerous 3D formats
Programming Libraries	X3DOM, X_ITE	Castle Game Engine, FreeWrl, others	Web authoring tools and 3D translators
3D Rendering	WebGL, others	WebAudio, MIDI2, streaming formats	WebXR, others
Hardware	CPU and GPU	Visual Display, Spatial Sound	User Interaction Devices

[online](#)

Many equivalent standards, all X3D

X3D Graphics Standards Relationships

online

X3DOM

- <https://www.x3dom.org>
- Integrate 3D content seamlessly into your webpage - the scene is directly written into the HTML markup. No Plugins needed. Simply include a JavaScript file. Free for non-commercial and commercial purposes.
- 50K ? downloads/day

X_ITE

https://create3000.github.io/x_ite

X_ITE is a comprehensive 3D library entirely written in JavaScript and uses WebGL for 3D rendering.

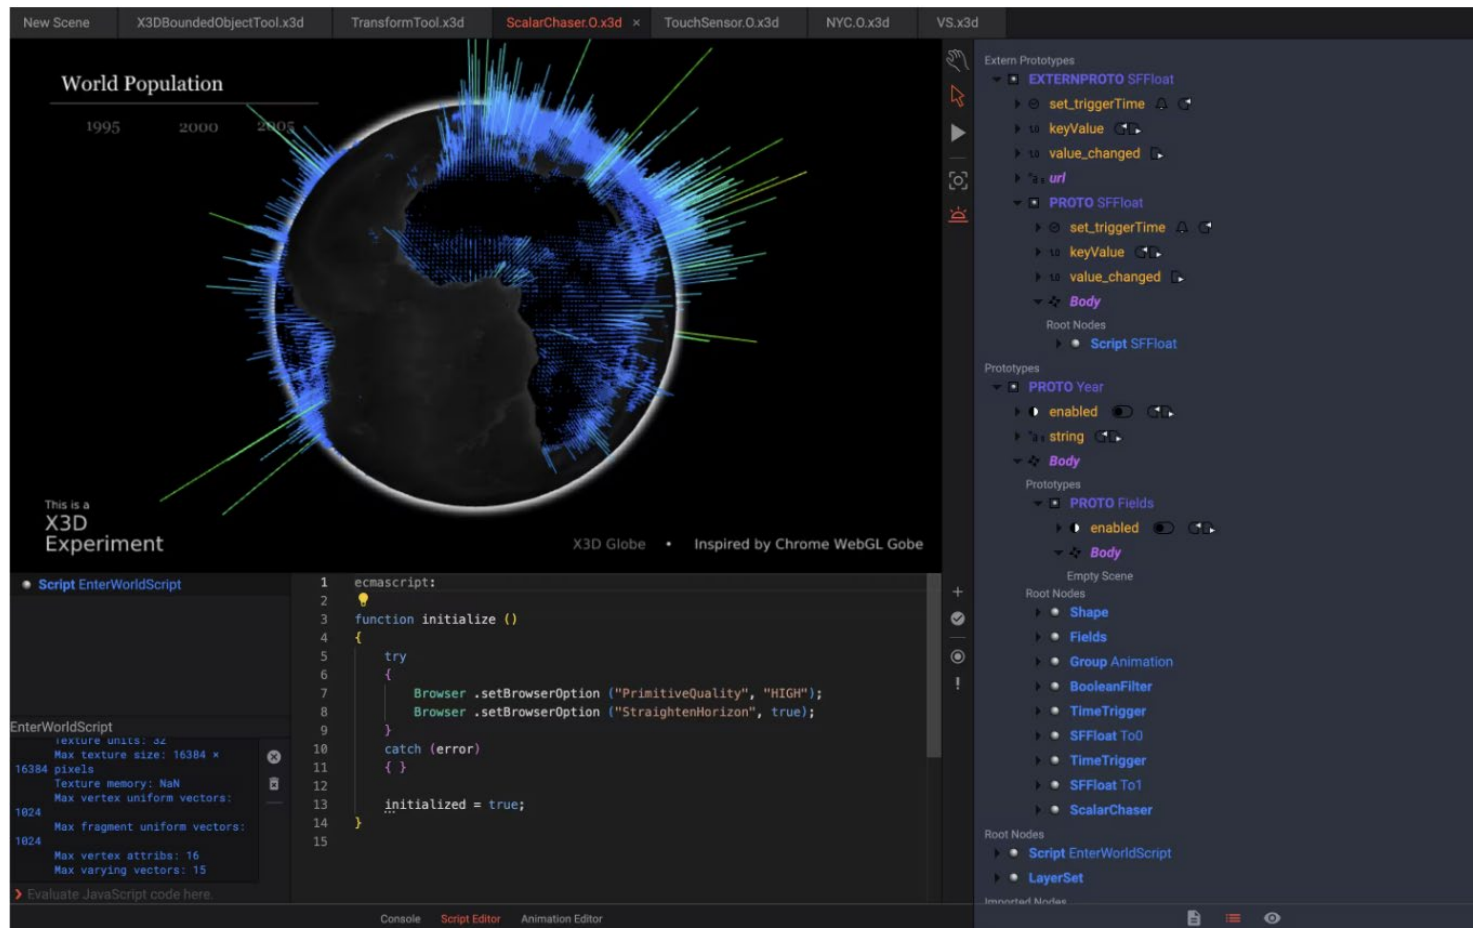

Authors can publish X3D, VRML, glTF and other 3D file formats online within an HTML5 page with X_ITE that works with web browsers **without** prior plug-in installation.

- [329K downloads](#)

X_ITE Sunrize — A Multi-Platform X3D Editor

Sunrize is an easy-to-use editor for X3D files based on X_ITE framework and launched via node.js JavaScript engine.

Castle Game Engine's [convert everything to X3D](#) online page

Online Converter for 3D and 2D Models

- **Convert from** any model format supported by Castle Game Engine: glTF, X3D, VRML, IFC, Wavefront OBJ, STL, Collada, 3DS, MD3, Spine JSON and more.
- **Convert to** X3D, IFC and STL. *We plan to add glTF as an additional output format soon.*

Can also be used to **convert between X3D encodings (classic, XML)** and pretty-print X3D and VRML models.

Choose Files

No file chosen

Convert

Output:

- X3D, XML encoding (extension `.x3d`)
- X3D, classic encoding (extension `.x3dv`)
- STL, binary (extension `.stl`)
- IFC JSON (extension `.ifcjson`)

Blender model conversion to X3D

- Continuing improvements on native Blender improvements for X3D model export by X3D Ecology Working Group
- Castle also has detailed guidance on Blender
- <https://castle-engine.io/blender>

X3D Resources

- <https://www.web3d.org/x3d/content/examples/X3dResources.html>
- Extensible 3D (X3D) Graphics is the royalty-free open standard for publishing, viewing, printing and archiving interactive 3D models on the Web.
- Numerous resources are available to support both X3D Graphics and its compatible predecessor, the Virtual Reality Modeling Language (VRML).
- X3D Resources has convenient links to many players, converters, and modeling tools.

X3D Resources

Extensible 3D (X3D) Graphics is the royalty-free open standard for publishing, viewing, printing and archiving interactive 3D models on the Web.

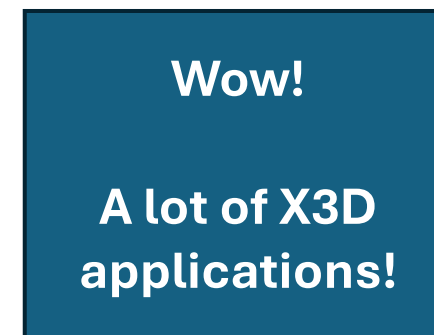

[Applications](#) | [Authoring Tools](#) | [Authoring Support](#) | [Books](#) | [Conformance](#) | [Conversions](#) | [Examples](#) | [Export and Import](#) | [Feedback](#) | [License](#) | [Mobile](#) | [Model Search](#) | [PowerPoint](#) | [Programming Languages](#) | [Quality Assurance \(QA\)](#) | [References](#) | [Security](#) | [Showcase](#) | [Training and Tutorials](#) | [Videos](#) | [VRML](#) and [Open Inventor](#) | [Wish List](#) | [X3D Developers Guide](#) | [X3D-Edit](#) authoring tool | [X3D Progress](#) | [X3D Scene Authoring Hints](#) | [X3D Tooltips](#) | [X3D Validator](#) (currently offline) | [Xj3D](#) | [Contact](#)

Extensible 3D (X3D) is the third-generation successor to the Virtual Reality Modeling Language (VRML), providing full backwards compatibility and adding functionally equivalent XML and compressed-binary file encodings.

- [Player support for X3D components](#) provides a feature comparison of major X3D viewers, for each player and each X3D component.
- A simple example test scene is [HelloWorld.x3d](#) provided in a variety of X3D encodings and conversions: ([.x3d XML](#), [.x3dv ClassicVRML](#), [.wrl VRML97](#), [.html listing](#), [.html X_ITE](#), [.xhtml X3DOM](#), [.java Java source](#), [.json JavaScript Object Notation](#), [.py Python source](#), [.ttl Turtle source](#) with [SPARQL query](#), [.x3db compression](#), [XML canonicalization \(C14N\)](#), and [.png image](#))
- The [HelloWorld.x3d](#) scene is a simple authoring example that illustrates the minimalist X3D Interchange profile. Also available: internationalized [Hello World Scenes](#).
- Please install one of the following X3D players to view X3D/VRML scenes and browse these examples.

X3D players and plugins from [Web3D Consortium members](#):

1. [InstantReality](#) is a high-performance X3D player and Mixed Reality (MR) system by Fraunhofer IGD (Linux, macOS, Windows) ([forum](#)).
2. *Special mention.* [X3DOM](#) (pronounced "X-Freedom") implements a high-performance X3D player in open-source JavaScript. Authors can publish X3D source within an HTML5 page that works in modern Web browsers *without* prior plugin installation ([get involved](#) and [forum](#)).
3. [FreeWRL/FreeX3D](#) X3D/VRML browser (open-source C). (Linux, macOS, Windows) ([contact](#), ([bug tickets](#))). Also described on [Wikipedia](#).
4. [H3D/H3DViewer](#) is an open-source C++ API and X3D player (Linux, macOS, Windows) ([forum](#)).
 - Includes haptics support, [Rigid Body Physics component](#), plus 3D texturing and the [Volume Visualization component](#) for the [Medical Working Group](#).
5. [Xj3D](#) is an open-source Java viewer and application codebase for X3D graphics scenes.
 - [Xj3D Evolution](#) strategy describes how Web3D working-group stakeholders are implementing further improvements to Xj3D.
 - [NPS source branch for Xj3D viewer](#) describes current details for the active [Xj3D Sourceforge](#) project.
 - [Xj3D.org](#) original distribution includes a [developer page](#).
6. [GeoVrml Run-Time](#) was originally used for VRML97 GeoVrml examples.
7. [Dynamic-3D](#) is a pure Java-based 3D Graphics Engine for web browsers. Open source renderer by Mitch Williams.

Other X3D players, not (yet?) Web3D Consortium members:

8. *Special mention.* [X_ITE X3D Browser](#) implements a high-performance X3D player in open-source JavaScript. Authors can publish X3D source within an HTML5 page that works with Web browsers *without* prior plugin installation.
9. [BitManagement's BS Contact](#) and [BS Contact Geo](#) X3D/VRML97 plugins for HTML web browsers (Linux, MacOS, Windows) ([support](#)).
10. [Castle Model Viewer](#) (formerly view3dscene) is a free cross-platform VRML/X3D browser that also supports other 3D model formats (FreeBSD, Linux, MacOS, Windows) built by [Castle Game Engine](#) ([forum](#)).
11. [Cortona3D Viewer](#) by Parallel Graphics, VRML plugin for Netscape or Internet Explorer ([support](#)).
12. [GPAC](#) is an Open Source multimedia framework for presentation technologies (graphics, animation and interactivity) and packaging formats such as MP4. (Linux, macOS, Windows).
13. [Heilan X3D Browser](#) open-source C++ browser for audio research (Linux, macOS, Windows).
14. [libx3d](#) open-source C++ libraries for X3D.
15. [NuGraf](#) by Okino provides a 3D rendering, translation, viewing & data optimization system ([Windows + emulators](#) and plugins for other authoring tools) ([support](#)).
16. [Octaga Player 5.0](#) (and Octaga-only [plugin test page](#)) by [Octaga VS](#) is a high-performance X3D/VRML browser (Windows) ([support](#)). Downloads of prior Octaga Player 2.1 also available at [c|net](#).
17. [OpenVRML](#) is a free cross-platform runtime for VRML and X3D (FreeBSD, Linux, macOS) ([support](#)).
18. [Orbisnap](#) is a free multi-platform standalone VRML97 viewer for visualizing virtual worlds, and can connect to a [Simulink 3D Animation](#) server (FreeBSD, macOS, Linux, Unix) ([support](#)).
19. [SwirlX3D Free Player](#) by Pine Coast Software (Windows) ([support](#)).
20. [V-Slam](#) browser for virtual and mixed reality devices, also released as [open source](#) based on Unity3D engine.

Many authoring tools have emerged since X3D can be used for any purpose without royalty fees.

[Tool support for X3D components](#) provides a feature comparison of major X3D authoring tools, for each player and each X3D component.

1. [X3D-Edit](#) is the primary authoring tool used at NPS to create the X3D, Sourcebook and Savage example archives. Available free.
 - *Latest version.* [X3D-Edit](#) is available for Windows, macOS, Linux, Solaris and [Netbeans](#) users ([support](#)).
 - *Original version.* [X3D-Edit 3.1](#) is still available but no longer supported. [X3D-Edit Authoring Tool for Extensible 3D \(X3D\) Graphics](#) provides a 7-page summary of X3D-Edit 3.1 features and usage.
2. [AC3D](#) is a small, simple, easy-to-learn 3D authoring tool that includes support for X3D export (Linux, macOS, Windows) ([contact](#)).
3. [Blender](#) is an open-source 3D authoring tool that includes support for X3D import/export (FreeBSD Linux, macOS, Windows) ([download](#)).
 - *Castle Game Engine (Castle Model Viewer)* documentation provides excellent guidance on [Exporting from Blender to X3D](#).
 - Blender has many import/export capabilities. [Blender Model Export To X3D using X3D-Edit](#) describes an example design & export session.
 - Further notes and improvements on Blender export to X3D are provided by [Kambi modifications to Blender X3D exporter](#) is a free export plug-in
 - [BitManagement X3D exporter for Blender](#)
4. [BS Content Studio Tool](#) for easy and fast creation of 3D scenes and applications, from [BitManagement](#) ([support](#)) November 2014: [new update announced](#).
5. [BS Editor](#) is the original authoring tool from [BitManagement](#).
6. [bvhacker](#) supports editing of [Biovision BVH](#) files, which is a file format for recording post-processed motion-capture data. BVH is the basis for [Humanoid Animation \(HAnim\) Motion Data Animation](#) capabilities, which are supported in [X3D version 4](#), [Human Animation component](#), [HAnimMotion](#) node.
7. [insight3d](#) is an open-source, image-based modeling tool for creation of buildings from photographs.
8. [MeshLab](#) is an open-source, portable, and extensible system for the processing and editing of unstructured 3D triangular meshes (Win64, MacOS, Linux Snap). Downloads are available there as [official release](#), or else on the [github repository](#) as a [developer release](#).
9. [ParaView](#) is a parallel visualization application to visualize large data sets.
10. [RawKee](#) X3D Exporter Plug-in for [Maya](#) by [Aaron Bergstrom](#)
11. [Rez](#) provides an open-source framework and tools for translating planetary terrain data and images to different formats including multi-resolution versions optimized for web browsing.
12. [SwirlX3D Editor](#) is an X3D/VRML authoring environment from Pincoast Software (Windows) ([support](#)).
13. [Seamless3d](#) is open-source 3D modeling software designed for artists ([support](#)). Additional reference: [Wikipedia-Seamless3d](#).
14. [SubmarineX3D](#) is a simple X3D Editor from University of Perugia Italy (Linux, macOS, Windows) ([contact](#)).
15. [Titania X3D Editor](#) is a free standalone X3D/VRML authoring tool primary developed for Ubuntu/Debian operating system.
16. [VIM \(Vi IMproved\) Editor](#) does syntax highlighting and folding (collapsing of blocks) for both XML and VRML97. Nothing specific for X3D yet.
17. [Viper](#) is a VRML97 source-code parser by [NIST](#).
18. [VrmlPad](#) is a professional editor for VRML programming.
19. [Visualization Toolkit \(VTK\)](#) is an open-source toolkit, written in C++, for large scale 3D data visualization that offers X3D export.
Related: [Mayavi](#) is a Python interactive scripting interface for VTK that includes X3D export of mesh-based surfaces.
 - [Enthought Blog](#) entry describes corresponding Mayavi capabilities for X3D.
 - [X3D Pathway: Interactive HTML with Python and X3D](#) describes two compelling examples and the production workflow used.
20. [White Dune](#) is a graphical VRML97/X3D editor, simple NURBS/Superformula 3D modeller, animation tool, and VRML97/X3DV command-line compiler. Also includes a converter from X3D to [RenderMan Interface Bytestream \(RIB\)](#) protocol. (FreeBSD, macOS, Linux, Unix, Windows).
21. [Wings 3D](#) is an advanced subdivision modeler that is both powerful and easy to use. It can be used as a free open-source X3D/VRML authoring environment (Linux, macOS, Windows) ([forum](#)).
22. [Open-Source 3D Component Editor using X3DOM](#) by Fraunhofer IGD is an [example X3D scene editor](#) that runs in a web browser.
23. [Altova XMLSpy](#) is an XML development environment for modeling, editing, debugging and transforming XML technologies.
 - XMLSpy provides built-in support for numerous file types, with [native support support added in v2020r2](#) for X3D (Extensible 3D), "a file format used for representing and communicating 3D scenes and objects embedded in applications." Features include context-sensitive parent-child node relationships and attribute values, plus full validation ([screenshot](#)).
 - [X3D-XmlSpyProject.spp](#) ([online](#)) is an overview project for X3D specification-development work.
 - XMLSpy *ContentCatalog.spp project files are also provided with each of the [X3D Example Archives](#).
24. [X3DToolkit](#) by [INRIA Models and Algorithms for Visualization and Rendering \(MAVERICK\)](#) is a portable LGPL free C++ toolkit for loading, displaying and processing X3D models, designed for 3D developers.
25. [X3D Java Scene Access Interface Library \(X3DJSAIL\)](#) provides standard X3D Java interfaces with concrete implementation classes, all as open source. This application programming interface (API) library is strongly typed to avoid authoring errors, and is autogenerated from the [X3D XML schema](#) and [X3D Unified Object Model \(X3DUOM\)](#) to ensure correctness.

Wow again!
A lot of X3D tools and software libraries!

X3D Scene Authoring Hints

- <https://www.web3d.org/x3d/content/examples/X3dSceneAuthoringHints.html>
- These hints provide a collection of style guidelines, authoring tips and best practices to improve the quality, consistency and maintainability of Extensible 3D (X3D) Graphics models.

X3D Scene Authoring Hints

These hints provide a collection of style guidelines, authoring tips and best practices to improve the quality, consistency and maintainability of Extensible 3D (X3D) Graphics models.

[Audio](#) | [Authoring](#) | [Color](#) | [containerField](#) | [Coordinate Systems, Rotations](#) | [CORS](#) | [Credits](#) | [Dates](#) | [Encodings](#) | [HTML](#) | [Images and Videos](#) | [Inlines and Prototypes](#) | [License](#) | [Meshes](#) | [meta Statements and Metadata Nodes](#) | [Motion Animation](#) | [Naming Conventions](#) | [Scale Factors and Unit Conversions](#) | [Scripts \(Java, JavaScript, JSON\)](#) | [Strings](#) | [SVG](#) | [URL Links](#) | [Validation](#) | [Viewpoints and Navigation](#) | [Volumes](#) | [VRML](#) | [X3D Developers Guide](#) | [X3D-Edit](#) authoring tool | [X3D Progress](#) | [X3D for Web Authors](#) book | [X3D Resources](#) | [X3D Tooltips](#) | [X3D Validator](#) (currently offline) | [Xj3D](#) | [Contact](#)

X3D Tooltips

- <https://www.web3d.org/x3d/tooltips/X3dTooltips.html>
- X3D Tooltips provide authoring tips, hints and warnings for each node and field in X3D. Example: [Viewpoint.description](#)
- Source for the X3D Tooltips is in XML, enabling them to be used in programming APIS: [Java X3DJSAIL](#), [Python X3DPSAIL](#) [x3d.py](#) etc.
- Multilingual versions also exist for earlier versions of X3D

Extensible 3D (X3D) 4.0 Tooltips

X3D Tooltips provide authoring hints for each node and field found in X3D Architecture [version 4](#) International Specification (IS).

X3D Tooltips provide context-sensitive support for authors and are usable within tools (such as [X3D-Edit](#)). These tooltips are primarily for X3D XML encoding, but other X3D file encodings and programming-language bindings are similar. Each node's table entry also provides appropriate links to the [X3D Abstract Specification](#), [X3D Schema Documentation](#), [X3D DOCTYPE Documentation](#), [X3D JSON Documentation \(draft\)](#), [X3D Regular Expressions \(regexes\)](#), and [X3D Java SAI Library \(X3DJSAIL\)](#).

X3D Resources, Examples: Scene Archives for X3D

- <https://www.web3d.org/x3d/content/examples/X3dResources.html#Examples>
- The X3D Examples Archives demonstrate how X3D nodes and scenes work. Thousands of scenes are provided in all X3D encodings. You can browse them individually online or download fully complete, separately installable .zip archives.

Web3D Consortium Open-Source License

Grants royalty-free (RF) rights suitable for any purpose

- Background on BSD-style license details found at <https://www.web3d.org/x3d/content/examples/X3dSceneAuthoringHints.html#license>
- X3D authors can place meta statements in a scene to document what license being applied. For example, one of the following is typically included in the X3D scenes found in the Web3D Consortium and NPS open-source example archives:

```
<meta name='license' content='..../license.html'/>
```

X3D Model Documentation

- XML-based .x3d model converted into HTML (here is an [example](#))
- Annotations: note that **meta** tags have structure identical to HTML, using Dublin Core or other structured metadata vocabularies
- Line numbers, hyperlinks, tooltips, cross-links for event ROUTES
- Hover mouse to check images are present (or play audio)

X3D Model Documentation: GeometryPrimitiveNodesWhiteBackground.x3d

X3D-Edit Authoring Tool

- <https://www.web3d.org/x3d/tools/X3D-Edit/X3D-Edit.html>
- X3D-Edit is a free, open-source Extensible 3D (X3D) Graphics authoring tool for simple high-quality authoring, editing, import/export, validation and viewing of X3D scenes.
- X3D-Edit provides convenient links to many players, converters, and modeling tools.
- X3D-Edit Preferences include X3D Players, relevant Modeling Tools, Audio and Image tools, etc.

Material Fields

| | | | | | |
|------------------|-----------|------------|-----|---------------------------------------|---------|
| diffuseColor | 0.1 | 0.5 | 1.0 | <input type="color" value="#1a80ff"/> | #1a80ff |
| emissiveColor | 0.1764706 | 0.18039216 | 0.0 | <input type="color" value="#2d2e00"/> | #2d2e00 |
| specularColor | 0.9843137 | 1.0 | 0.2 | <input type="color" value="#ffff33"/> | #ffff33 |
| transparency | 0 | | | | |
| ambientIntensity | 0.2 | | | | |
| shininess | 0.2 | | | | |

Universal Media (overwrites Material fields)

theme: none

Geometry

Sphere

Directional Light

on:

color: 1.0 1.0 1.0 #ffffff

direction: -0.7071 0.0 -0.7071 normalize

intensity: 1

ambientIntensity: 1

Background

skyColor: 0.0 0.5019608 0.00392156 #008001

Material

```

<Material
diffuseColor="0.1 0.5 1.0"
emissiveColor="0.1764706 0.18039216 0.0"
specularColor="0.9843137 1.0 0.2"
transparency="0"
ambientIntensity="0.2"
shininess="0.2"
containerField="material"
/>
    
```

Material specifies surface rendering properties that are applied to the adjacent geometry node inside a shared parent Shape node. Hint: DEF/USE can provide a similar look & feel for related shapes in a scene.

X3D for Web Authors, San Carlos Cathedral by Michele Foti

X3D Example Archives: X3D4AM, X3D for Advanced Modeling, San Carlos Cathedral

We are building a large, detailed archival model of the [San Carlos Cathedral](#) in Monterey California in order to show low-cost modeling and photographic methods for documenting [cultural heritage](#) and supporting [historic preservation](#). This work includes a [case study paper](#), [historical reference materials](#) and a [TODO](#) list.

| 13 X3D Models | | X3D Model Descriptions |
|---|------------------------------------|---|
|  | Altar | Altar for San Carlos Cathedral |
|  | Bell | Bell for San Carlos Cathedral |
|  | Bell Old | Bell for San Carlos Cathedral in mid 19th century |
|  | Bench | Bench for San Carlos Cathedral |
|  | Century 19th Model | San Carlos Cathedral is the oldest continuously functioning church and the first stone building in the State of California. |

X3D also lets authors attach typed metadata sets to any object in a model's scene graph.

X3DOM Editor allows online changes (I added a Viewpoint)

X3DOM editor: Edit X3D code and click button to load: or copy to clipboard as link:

Make sure to remove any initial white space. You can load external links with index.html?url=https://server/my.x3d . [📄 K E Y B O A R D](#)

Castle Viewer on iPhone on Android!

- Castle viewer is open-source player, converter and game engine written in object-oriented Pascal
- Castle lead Michalis Kamburelis is also primary design architect for integrating glTF 2.0 into X3D 4.0
- Thus glTF models are loadable in X3D and advanced physically based rendering is achieved equivalently
- Current work is deploying Castle viewer to online stores for iPhone and Android, shown by screenshots
- All open source, runs on Windows iOS Linux, fast!!

Virtual Iron Bird (VIB)

- 2004 NASA Workshop chaired by Dr. Julian E. Gómez
- How to move deliberately past decades of marked-up blueprints for Space Shuttle engineering into a new digital-capabilities era, comprehensively, without losing history of engineering changes?
- Aren't things like VIB key parts of our Digital Heritage as well?

Audio and Spatialized Sound

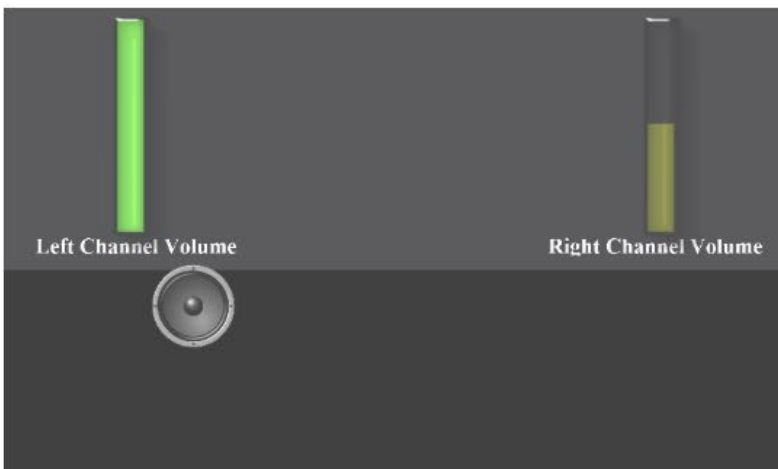

**Bologna
Thursday**

- X3D4 has fully integrated W3C Web Audio API – powerful.
 - (examples) <https://medialab.hmu.gr/minipages/x3domAudio>
- Thanos Malamos, Efi Lakka (remotely) and I are presenting at I3DA 2025 on initial implementation of *AcousticProperties* for physically based aural rendering of rooms, performance spaces.
- We are crossing a new horizon! Please stand by...

Split Channels

Filters

Spatial Audio Camera Animation

Recommendations

- Our cups overfloweth... No blockers remain, X3D is ready to go for you!
- World Wide Web remains the greatest database of the human race.
- Our 3D Digital Heritage deserves preservation... forever. Let's do that.
- Everyone is welcome to collaborate using X3D tools and open standards.

**Ah, but a man's reach should exceed his grasp,
Or what's a heaven for?**
